Lagos

Summary

Highly focused and multifaceted Software developer experienced working with React and Next framework also in working with UX/UI Product designers in structuring and designing web pages, products, also collaborate with backend developers in ensuring technical feasibility and fetching data from the backend with a strong client satisfaction record.

Experience

Frontend React Developer

UNIGIG (University Projec) • Lagos, Nigeria

08/2022 - Present

Developed, maintained, troubleshoot, enhanced and documented software products and components developed in relation to the requirements and detailed UI & UX design from the figma.

Collaborated with team members especially backend developers to consume REST API'S to bring all functionalities to the client side. I also tested the site for usability and fixing any bugs.

I helped developed and designed the Student, Admin, Lecturer, section, Registration Officer, Exam Officer, Parent section, HOD sections e.t.c.

I helped to implement several functionalities from the backend using API'S like user authentication for students using Json Web Tokens.

I created a feature for uploading, saving, editing and retrieving student's information and other users profile .

I Created a dashboard to handle various users. I developed the search functionality to help students find their results with their Academic Year.

.

Front End Developer (Contract)

Support Plug • Lagos, Nigeria

06/2022 - Present

Designing and developing scalable, robust, testable, efficient, and easily maintainable code.

I developed and worked with other developers to help manage some Client's websites and Web Applications Using various tools and languages of the web like HTML5, CSS3, JAVASCRIPT, REACT, WORDPRESS, REDUX, GIT COMMANDS etc. I also manage the files and databases on Cpanel.

Front End Developer

Forbes Digits • Lagos, Nigeria

02/2022 - 06/2022

Improved Forbes web development structures/systems by adding new features and infrastructure to enhance customers' experience.

I handled the Sales landing page for Forbes digits which brought more conversions and subscribers specifically about 1200 clicks per page and around 7% conversions for a chat on WhatsApp or telegram response. Code restructuring, explicit and well-formatted reusable codes and libraries.

Developing and debugging responsive web applications and websites.

Software Developer

Ten Pharmacy and Stores • Lagos, Nigeria

11/2019 - 01/2020

Developed, maintained, troubleshoot, enhanced and documented software products and components developed in relation to the requirements and detailed design.

Collaborated with team members and stakeholders to communicate with other services through the event and messaging platforms and also tested the site for usability and fixing any bugs.

Created a Feedback form for to allowing site users to contact the Pharmacist for health consultation.
